

2011 Victorian Graduands Celebrate

MIN KU

“What lies behind us and what lies before us are tiny matters compared to what lies within us,” said Ralph Waldo Emerson, and what lies within the extraordinary cohort that came to receive their Statements of Accreditation on Saturday 12th February is the potential and opportunity to make great change to the medical radiations profession.

It was wonderful to see the combined cohort of RMIT and Monash University Diagnostic Imaging, Therapy and Nuclear Medicine graduands partaking in this celebration at The Centre, Ivanhoe, Melbourne.

Once again, the annual 2011 AIR/VSNMT Professional Graduation Dinner in combination with the 28th Stanley L Martin Memorial was delivered with style and grace.

The orator for the evening, Mr David Collier (Chief Executive AIR), delivered an inspirational speech on his personal experiences with dealing with all facets of our profession. He acknowledged the hard work required to complete these degrees and congratulated the graduands on their entry into a fabulous profession.

Also to be congratulated on this evening, were our professional colleagues who had committed time and effort into completing higher qualifications in their quest for continual professional development.

Congratulations are extended to Phil Jones for his attainment of his Masters in Public Health.

Among the 124 guests that attended, it was heartening once again to see that many parents and friends attended this important occasion; a testament of unconditional support and encouragement. To all the graduands, please take the time to appreciate these wonderful people who have given selflessly to ensure that you have a stellar career.

It was a notable highlight to see an increase in our tutors coming to support these graduands, and I would like to acknowledge the persistence and effort sometimes required to get the graduands to this point of their career.

These are fine graduands who have had much time and effort invested in them and

it was a great delight to be there to celebrate their achievements with them. Thank you also to the various individuals from the medical imaging, radiation therapy and nuclear medicine communities who made an effort to attend.

The Valedictorians for the evening Roshini Thomas, Sarah Coleiro and Victoria Williams did their professions justice by producing such a high standard in their speeches. Congratulations on some fine presentations.

New graduates, professionals, friends and family enjoyed a marvellous dinner with the evening being rounded off with some creative karaoke and impressive dancing by young and old alike. It was another memorable event with many proud and smiling faces all around.

Finally this evening would not have occurred without the significant support of the many sponsors including Elekta/Impac, WBRC, and Agfa. The sponsor's contributions towards the event were highly valued and we would also like to especially thank Suzie Smith from Agfa for some superb photography.

The AIR and the VSNMT would like to congratulate the graduands and welcome them into their respective careers.

“To accomplish great things, we must not only act, but also dream; not only plan, but also believe.”

Santiz Anatole France
